Summary

I am currently a Senior Research Scientist in the Robot Intelligence Lab at **Samsung Research America**, we are developing humanoid AI systems along with Foundation models. My research focuses on Agentic Robotics, Robot Learning, Representation Learning, and Long-horizon task reasoning, especially how to enable robots to understand task and scene in long-horizon scope. My work has been presented at conferences such as **CoRL**, **ICRA**, and **IROS**. I earned my Ph.D. in Computer Science from the School of Computing and Augmented Intelligence at Arizona State University, supervised by **Prof. Heni Ben Amor**, and completed my Master's degree in Mechanical Engineering at Case Western Reserve University under the guidance of **Prof. Kiju Lee**.

Experience

Samsung Research America (SRA)

Mountain View, California

SENIOR SCIENTIST

Jan. 2026 - present

- Built full-stack humanoid robot AI infrastructure: perception (SAM3, DA), planning (Qwen3.5), localization, navigation, manipulation (Pi0.5).
- Agentic Robotics: Developed agent harness with standard operating procedure (SOP) guidance for long-horizon tasks in home environments. [S1]

Honda Research Institute USA, Inc.

San Jose, California

POSTDOC SCIENTIST

Sep. 2024 - Dec. 2025

- System I & II: Create Intelligent Context Reasoning via Large Vision Model and LLM, where system II provides contexts for Long-horizon dexterous action policy (System I) for arm + multifinger hands.
- Developed a scene graph-based assistant generation framework for a teleoperated avatar robot. This framework facilitates task understanding, encodes spatial relationships during rearrangement tasks, and constructs planning-capable graphs using graph edit distance. [C9] [C10]
- Improved human intention estimation and action recognition by leveraging attention-based dynamic scene graphs for dexterous teleoperation.

Interactive Robotics Lab, ASU

Tempe, Arizona

RESEARCH ASSOCIATE

June. 2020 - Aug. 2024

- Embodied AI: Proposed Diff-Control, an Action diffusion policy incorporating ControlNet from the domain of image generation to robot actions. [C7]
- Created a multimodal learning framework (α -MDF) using attention mechanism and differentiable filtering, which conducts state estimation in latent space with multiple modalities. [C5]
- Developed differentiable Ensemble Kalman Filters (DEnKF) framework incorporating algorithmic priors for robot learning, i.e., learning system dynamics from observations, and learning representations from high-dimensional space. [C4]
- Deployed the differentiable filtering framework with smartwatch for ubiquitous robot control tasks, i.e., teleoperation, drone piloting. [C6]

RadiusAI, Inc.

Tempe, Arizona

COMPUTER VISION DATA SCIENTIST (PART-TIME)

Sep. 2020 - Dec 2023

- Refined Multi-object tracking (MOT) algorithms using Bayes Filter for Video Analytics for indoor and outdoor cameras, improved ~9% accuracy.
- Developed multi-objective optimization technique base on Frank-Wolfe algorithm for monocular depth prediction model across multiple datasets.
- Researched on monocular depth prediction models with varied advanced architecture, Vision Transformer and multi-scale local planar guidance blocks, achieved depth estimation with 0.117, 0.416 on abs REL and RMS error metrics and 0.868 on d1 metric on NYU depth testset.

Case Western Reserve University

Cleveland, Ohio

RESEARCH ASSISTANT

Aug. 2017 - Aug. 2019

- Led social robot project "Woody and Philos" project, developed advanced algorithms in Computer Vision for social robots.
- Real-time Human Facial Emotion Expression Recognition for Human-robot Interaction using deep learning and machine learning technique. (featured on Case Western Daily) [J1]
- Human-Robot Interaction: Developed social robots-"Philos" & "Woody" platform and investigated the potential of social robots as cognitive assessment applications for older adults. (featured on ideastream)

CWRU & ASU

Cleveland, Ohio & Tempe, Arizona

TEACHING ASSISTANT

2018 - 2019, 2023 - 2024

- Served as the teaching assistant for EMAE250 (Computers in Mechanical Engineering), instructing students on numerical problem-solving using Matlab and providing guidance throughout the learning process.
- TA for CSE205 (Object Oriented Programming), instructing students on coding with varied data structure and OOP tasks in Java.

Uber Technologies, Inc.

Xi'an, China

DATA ANALYST

Jan. 2016 - Aug. 2016

- Coordinated data analysis and fraud detection with the operation team. Conducted competitor tracking and advising on driver incentives.

Education

Arizona State University

PH.D. IN COMPUTER SCIENCE, ADVISOR: PROF. HENI BEN AMOR
• Thesis Focus: Robot Learning via Deep State-Space Model GPA: 4.0/4.0

Tempe, Arizona
Aug. 2019 - Aug. 2024

Case Western Reserve University

M.S. IN MECHANICAL ENGINEERING, ADVISOR: PROF. KIJU LEE
• Thesis Focus: Automated Facial Emotion Recognition for Human-Robot Interaction GPA: 3.8/4.0

Cleveland, Ohio
Aug. 2016 - May. 2019

Southwest Jiaotong University

B.S. IN MECHANICAL ENGINEERING
• Project: Roller bearing fault diagnosis based on wavelet analysis GPA: 3.6/4.0

Chengdu, China
Aug. 2011 - May. 2015
